

# Transaction Document School

## *Comments from Our Students*

### **Executive and Managerial Students**

"The course material, and the way it was presented, was excellent. It would be impossible to teach my team this amount of relevant information internally. In short, this is a must for all my staff."

**VP Document Services, WW Financial Institution**

"My people now develop more cost-effective solutions, make fewer mistakes, and take less supervision. The cost of training is trivial compared to the cost of inadequately trained staff."

**Development VP, Large Mail Service Provider**

"Our reps provide much better support after graduating from the acadami program. Senior technical employees keep informed of new industry trends and developments via these courses. I recommend this program for any customer-facing or technically-focused staff."

**General Manager, Large Service Bureau**

"An excellent course that provides a great understanding of the full picture for Transaction Documents. I would love to have a customized version as a required boot camp for new employees in our organization."

**Technology Manager, Large Mail Service Provider**

"Very informational and enjoyable, and a must for all business managers. Thank you again for delivering a great course."

"I will consider the course for my development and QA teams, and I would like to get my EDP next year."

"As a manager I learned that training should always continue."

### **Other Students**

"I will recommend this course to management for colleagues."

"I think this course will be very useful for me in the future in terms of improving my approach to a new project, and the results. Thanks!"

“Good day! The overall course is fantastic. I do plan to send 10 - 12 people on this course in 2011, and to move on to my own EDP designation as soon as I qualify.”

“Great course - excellent speakers!”

“Great teachers, great content!”

“Love the course and I would love to come back to get my EDP.”

“Good document life-cycle and systems sections, and listing the products next to the process steps. I liked the hands on exercises that draw to the topic.”

“Good job! I enjoyed the class. It really reinforced the previous class and great way to wrap up. I can't wait to review our current workflow.”

“I liked the real-life situation examples. They filled in gaps in the overall processes that I worked with where I previously did not need to know the why.”

“Great detailed information; good historical information helped me understand the current state of the industry.”

“Course content good at covering the basic fundamentals from file to finished product.”

“Very valuable - helped the common person with a high level understanding of the processes, and gave them the meat and potatoes.”

“Really enjoyed the week!”

“Great course! Very informative, interesting, and well presented.”

“Excellent Course & topics - the time just flew by!”

“As a business person, I got a lot out of the program.”

“Found the program filled technical gaps and gave me a better understanding of our capabilities.”

“Really valuable information...I look forward to the next level.”
